

Instruction

Making a deposit to TenkoFX account via Ethereum

Ethereum is a platform for creating decentralized online blockchain-based services working on the basis of smart contracts. It was developed as a unified decentralized virtual machine. Ethereum technology makes it possible to register any transactions with any assets under blockchain-based smart contracts, without employing traditional legal procedures. This option is competing with the existing transaction registration system.

How to deposit your account via Ethereum

1. Log in to your account: click 'Log In' on the homepage at <https://tenkofx.com>.

Fill in the authorization form:

- Enter your email.
